

HOLIDAY SPIRIT

Holidays - most of us are waiting for them all year round. Before they arrive, we plan and while planning, we try to make our dreams of extraordinary travels, incredible adventures and new experiences come true. When they come - we enjoy every day, realize our plans, gain new experience and collect moments whose memories will make the time for the next vacation more pleasant.

First the time of waiting and planning, then the time of vacation, and then the time of cultivating post-holiday memories and subsequent plans. All these periods are unusual. They add colours to our everyday life and make the spirit of holidays with us all year round.

When the origami designer hears the slogan "holiday spirit". - what comes to his mind first? Tessellation requiring time and concentration, folded on the train during a long journey? Models reminiscent of holiday places - meadows rich in unusual flowers, forests full of original plants and unique animals, the sea abundant in sea creatures - throwing shells of incredible shapes to the shore? Or maybe lazy, unhurriedly folding modular nuggets and couscous? The range of possibilities is endless - combine your model with the spirit of holiday and send your diagram to the 2019 XVIII Plener Origami Convention Book.
